**Total Number of Uninsured in Amador, Alpine, Calaveras, Inyo, Mariposa, Mono, and Tuolumne counties combined: 1,000**

In the California Health Interview Survey dataset, Alpine, Amador, and Calaveras data for these metrics are grouped together with ITUP-designated Central Valley counties: Inyo, Mono, and Tuolumne. Data for the uninsured with incomes at or below 138 percent FPL are not available for these counties due to data masking. See ITUP's Central Valley Regional Coverage Fact Sheet (coming July 2022) for more data on Inyo, Mariposa, Mono, and Tuolumne counties.

In the California Health Interview Survey dataset, Alpine, Amador, and Calaveras data for these metrics are grouped together with ITUP-designated Central Valley counties: Inyo, Mono, and Tuolumne. In addition, much of the race ethnicity for this group of counties is masked due to data privacy policies. For these reasons, Alpine, Amador, and Calaveras are excluded from this figure.

Covered California’s data privacy policy rounds all figures to the nearest 10. As a result, grand totals shown may be more than 100 percent. Alpine county data, because of these rounding policies and a small population size, is particularly skewed. In addition, there was no data available for Black, Asian, and Native Hawaiian/Pacific Islander race/ethnicity categories in Alpine County.

Enrollments where the FPL of the member is not known are not included here. Covered California’s data privacy policy rounds all figures to the nearest 10. As a result, grand totals shown may be more than 100 percent. Alpine county data, because of these rounding policies and a small population size, is particularly skewed.

Due to small sample sizes and data privacy policies, percentages may equal more than 100 percent. All race/ethnicity data is masked for Alpine county, therefore, this county is excluded from this figure.
Social Drivers of Health (SDoH), also known as Social Determinants of Health, refer to the conditions in environments where people are born, live, learn, work, play, worship, and age that influence their health risks and overall wellbeing. Some of these drivers include access to safe housing, nutritious food, parks and green space, and even broadband and internet connectivity, all of which impact the ability of and opportunity for Californians to live their healthiest lives.
