## Engaging with CalAIM: Quick Links for Community-Based Organizations

#### What is CalAIM?

**<u>CalAIM</u>** is an initiative by the Department of Health Care Services (DHCS) to transform the Medi-Cal program with expanded benefits and enhanced care coordination by implementing broad delivery system, program, and payment reforms.

#### **PRIMARY GOALS:**

Identify and engage Medi-Cal members with complex needs through a whole-person care approach that addresses social drivers of health. Create a more consistent and seamless Medi-Cal system with standardized benefits and enhanced data sharing among providers.

Improve quality outcomes and reduce health disparities with value-based initiatives.

#### What is the Role of CBOs?

Health providers and community-based organizations (CBOs), like housing navigators and behavioral health clinics, are partnering with each other and Medi-Cal managed care plans (MCPs) to coordinate and deliver new Medi-Cal benefits, **Enhanced Care Management (ECM)** and **Community Supports**.

#### **Key Resources:**

- CalAIM Implementation Timeline
- ECM and Community Supports Frequently Asked Questions
- Community Supports Policy Guide
- ECM Policy Guide
- ECM and Community Supports Provider Standard Terms and Conditions

#### **CBO Funding Opportunities**

DHCS is providing two main funding streams to support local implementation of CalAIM:

- CalAIM Incentive Payment Program (IPP) funds go directly to MCPs, which they can distribute across their ECM and Community Support provider networks.
- Providing Access and Transforming Health (PATH) funds are available for counties, CBOs, and health care providers.

#### How to get Involved and Obtain Sustainable Medi-Cal Funding

01 02 03

Engage <u>your local Medi-Cal MCPs</u> to complete the contracting process and become an ECM or Community Supports provider.

Build your organization's service capacity with IPP and PATH funds and collaborate with partners by participating in a <u>county/regional PATH Collaborative</u>.

Share your success stories and lessons learned with other CBOs by getting paid as a vendor for the <u>PATH Technical Assistance (TA) Marketplace.</u>
